Software Engineer with 3+ years of experience in Laravel, Next.js, PHP, REST API Development, MySQL, and PostgreSQL. Proven expertise in developing scalable web applications, backend services, third-party integrations, and performance optimization. Experienced with Redis, Queue Jobs, Git, CI/CD Pipelines, Agile/Scrum methodologies, and Software Development Lifecycle (SDLC). Passionate about building secure, maintainable, and high-quality software solutions.

Technical Skills

- Frameworks:** Laravel, React.js, Next.js, Express.js
- Languages:** PHP, JavaScript, Solidity
- Frontend:** HTML5, CSS3, Bootstrap, jQuery
- Backend:** Node.js, Core PHP, REST APIs, MVC Architecture, WebSockets
- Databases:** MySQL, PostgreSQL, Redis
- Tools & Technologies:** Git, GitLab, Postman, Trello, CI/CD Pipelines, Remix IDE
- Concepts:** OOP, SOLID Principles, API Integration, Queue Jobs, Agile/Scrum, Software Development Lifecycle (SDLC)

Experience

- Pixel Web Solutions, Madurai, India

Full Stack Web Developer

Dec 2022 – May 2026
- Implemented authentication and authorization mechanisms to ensure secure user access and transaction processing.
 - Developed and maintained a secure cryptocurrency exchange with real-time trading, deposits, and withdrawals for multiple digital assets.
 - Integrated support for HYPE and ADA cryptocurrencies, contributing to a 25% increase in prospective client engagement.
 - Worked within an Agile environment, contributing to a 30% increase in team efficiency and 80% milestone approval rate through sprint planning, daily stand-ups, and iterative delivery.
 - Improved backend performance by 35% through asynchronous processing and load balancing for high-volume transactions.
 - Collaborated with cross-functional teams, vendors, and stakeholders to align technical solutions with business goals.
 - Integrated third-party services including KYC verification and real-time trade market sockets to enhance platform functionality and compliance.
 - Applied SOLID design principles and ensured compliance with PSR coding standards through code reviews.

Projects

- Layerx- Crypto Trading Platform

 - Developed a Binance-inspired staking module, enabling users to stake digital assets and earn rewards through fixed and flexible plans.
 - Implemented real-time order book updates using Pusher, enabling live bid/ask price synchronization and improved trading experience.
 - Used Redis caching to improve application performance and reduce database load.
 - Optimized backend performance through caching and query optimization, increasing transaction processing speed by 25%.
- ICapitalior - Crypto Trading Platform

 - Developed the ERC1400 token creation module within the admin panel for authorized token issuance.
 - Integrated MetaMask wallet connection for secure transaction signing and blockchain interaction.
 - Used Remix IDE for smart contract testing and deployment.

Kryptobox- Crypto Trading Platform

- Developed a cryptocurrency trading platform in Laravel, enabling secure exchange buying and selling of digital assets.
- Implemented Binance market price integration and conversion modules to calculate and display real-time cryptocurrency exchange rates.
- Integrated Sumsub KYC and KYB services to automate identity and business verification for the onboarding of retail and institutional users.

Education

Madurai Kamaraj University College

Master of Computer Application

CGPA:7.2

July 2017 – May 2020

Madurai Kamaraj University College

Bachelor of Science in Computer Science

CGPA:6.6

July 2014 – May 2017

Achievements

Pixel Web Solutions- 2024 Q1 OKR Winner

Recognized as the 2024 Q1 OKR Winner for exceeding project objectives, delivering high-quality solutions, and contributing to team success.
